

CloudBridge Solutions

Company Overview

CloudBridge Solutions is a cloud services provider headquartered in San Francisco, California. Founded in 2012, the company helps organizations migrate applications and infrastructure to public cloud platforms.

Business Focus

CloudBridge focuses primarily on cloud migration, cloud architecture, DevOps and application modernization. Its services are designed to help organizations accelerate cloud adoption while improving operational efficiency.

Industries Served

CloudBridge primarily serves software companies, financial services organizations, retail companies and technology-driven businesses.

Geographic Presence

The company is headquartered in San Francisco and primarily serves customers across the United States.

Core Capabilities

CloudBridge specializes in cloud, artificial intelligence, DevOps and application modernization. Cloud architecture and migration are among its strongest capabilities.

Technology Expertise

The company has expertise in public cloud architectures, cloud-native application development, DevOps automation and modern application platforms.

Services Offered

Services include cloud migration, cloud architecture design, application modernization, DevOps implementation and cloud optimization.

Partner Ecosystem

CloudBridge participates in Microsoft and AWS partner programs and supports customers operating on both cloud platforms.

Certifications & Expertise

CloudBridge maintains certified cloud architects, engineers and DevOps professionals across its delivery organization.

Typical Customer Profile

Its typical customers are organizations moving workloads from traditional infrastructure to public cloud platforms or modernizing existing cloud environments.

Key Strengths

Cloud migration, cloud architecture and DevOps are the company's primary strengths.

Differentiators

CloudBridge differentiates itself through a cloud-first delivery approach and strong focus on automation.

Recent Initiatives

The company has increased its focus on cloud-native application modernization and AI-enabled cloud workloads.

Strategic Focus

Its strategic priorities include cloud modernization, DevOps automation and AI-enabled application development.

Summary

CloudBridge Solutions is a cloud-focused partner with strong AWS and Microsoft ecosystem participation and expertise in cloud migration, DevOps and application modernization.
